## Software Engineer

Spain | [Portfolio](#) | [alejandro.vidal.sanchez16@gmail.com](mailto:alejandro.vidal.sanchez16@gmail.com) | [linkedin.com/in/alevidals/](https://www.linkedin.com/in/alevidals/)

### About me

---

Frontend Engineer with 6+ years of experience building scalable, high-performance web applications. Specialized in React, TypeScript, and modern frontend architectures, with a strong focus on performance, user experience, and developer experience. Currently co-leading frontend initiatives at Idealista, driving architectural decisions and improving products used by over 100 million monthly users. I enjoy collaborating closely with product and design teams and regularly leverage AI-assisted development tools to deliver high-quality software efficiently.

### Skills

---

Javascript, Typescript, Git, React, Next.js, Vite, Vitest, Jest, Playwright, Node, AI-assisted development (Claude Code).

### Experience

---

**Frontend Engineer, [Idealista](#)** – Madrid, Spain Nov 2024 – Present

- Maintained and modernized legacy codebases, improving maintainability and reducing technical debt.
- Contributed to the continuous improvement of a high-traffic advertiser detail page, delivering new features and enhancing performance.
- Designed and developed a reusable React component for file uploads, adopted across multiple chat-related projects.
- Built a reusable image rendering component, simplifying integration and reducing duplicated logic across applications.
- Collaborated closely with Product Managers and UX teams to refine product functionalities and improve user experience.
- Acted as frontend technical co-lead in the refactor of a high-traffic real-time chat application, improving scalability and reducing LCP from 3s to 0.6s without relying on SSR.
- Acted as frontend technical co-lead in the rebuild of a virtual property viewing platform, delivering features such as video calls and screen sharing.

**Frontend Engineer, [Aktios](#)** – Barcelona, Spain May 2022 – Apr 2024

- Played a key role in the end-to-end development of a ferry ticket price comparison platform with integrated purchasing functionality. Worked across both frontend (React/Next.js) and backend (Node.js + PostgreSQL), taking ownership of the backend in the final phase. In this role, I proposed and implemented improvements to simplify the data model and optimize the system architecture.
- Built a dashboard from scratch to help users track and analyze their electricity expenses. Led backend development while also working hands-on across the frontend.
- Developed a mobile application using Expo (React Native) designed to help people find lost pets.

**Frontend Engineer (internships), [Aktios](#)** – Barcelona, Spain Apr 2020 – Jun 2020

- Maintenance and development of an existing project using Spring Boot and Angular
- Help in the creation of a new project using Spring Boot and Angular

### Education

---

**Higher Vocational Education in Web Application Development, IES Doñana** Sep 2018 – Jun 2020

**Vocational Education and Training in Computer Systems and Networks , IES Doñana** Sept 2016 – Jun 2018
